

Riverside County Sheriff Brings Bomb Robots to MVHS

- Just a few pics from Sheriff Lawson showing us the amazing capabilities of his bomb robots.
- The smaller one is a \$250,000 robot used for small device bombs, while the larger tractor looking robot is a \$1,000,000 robot used to disable car bombs where the whole vehicle is used as an explosive.
- It was an amazing demonstration that even allowed students to drive both of these robots using the joystick controls (Yes, Sheriff Lawson was crazy enough to let high school students drive a \$1,000,000 robot).
